DOWNLOAD INSTRUCTIONS FOR THE PATCH (Short)

All update files posted in our download section are compressed files in a **.ZIP format**.   Use the following instructions to update your Floridom product(s).

Check the path to the Floridom product(s) you are updating by right-clicking on the icon on the desktop, then choose "Properties" and the "Short Cut" Tab and look for the box titled "Start in:" - this is the directory path of the program and is the location you will need to extract all files.

Write down or Copy the directory path **exactly** as it appears in the "Start in:" line, "Close" the "Properties" window.

Make sure no one on the network is using the program.

Only Google Chrome or Firefox will download the DPA Products Correctly. Do not Use any other web browser.

- Click on the FLDPAPATCH
- Click SAVE AS To the DESKTOP
- When finish Saving Double Click on the SAVE File
- On the window menu look for EXTRACT ALL and Click On It
- Select A Destination Directory (Your Current DPA Directory)
- Click on the Button that says Extract
- Yes to All
- When finished
- Open the DPA Program
- HELP and ABOUT FLORIDOM
- Make sure the version and the DPA Date reflected correctly as the same Date Posted on the Website.
